The Investment Universe of ABSL Manufacturing Equity Fund excludes sectors like Financial Services, IT Services, Logistics, Travel & Leisure, Infrastructure Development.</p>
Investment Strategy	<p>The Scheme aims to maximize long-term capital appreciation by investing in equity and equity related securities of companies engaged in manufacturing sector. The Scheme may also invest a small portion of its corpus in money market instruments to manage its liquidity requirements. All companies selected will be analysed taking into account the business fundamentals like nature and stability of business, prospects of future growth and scalability, financial discipline and returns, valuations in relation to broad market and expected growth in earnings, the company's financial strength and track record.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the Scheme Information Memorandum (SID) carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>Investments in the Scheme are subject to various risk factors including but not limited to risks associated with: investment in Equity and Equity related instruments, investments in Fixed Income Securities such as Price-Risk or Interest-Rate Risk, Credit Risk, Liquidity or Marketability Risk, Reinvestment Risk etc., investments in Foreign Securities, Investment in Interest Rate Swaps, investments in Derivatives (The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments), risks associated with Writing of Covered Call Options, risk Factors associated with Securities Lending and Borrowing, investments in Securitised Debt assets which would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The various risks associated with securitised assets include Prepayment Risk, Credit Risk, Liquidity Risk, Conversion risk, Price risks etc. Different types of securities in which the Scheme would invest as given in the Scheme Information Document/Key Information Memorandum carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. The above are some of the common risks associated with investments in various securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis. Further, the Fund/AMC is not guaranteeing or assuring any returns. Further, it should be noted that the actual distribution of IDCWs and the frequency thereof are indicative and will depend, inter-alia, on availability of distributable surplus. IDCW payouts will be entirely at the discretion of the Trustee. Investors may, if they wish, consult their legal, tax, investment and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, i.e. before making a decision to invest/redeem Units. Please refer to</p>

	<p>SID for detailed scheme specific risk factors.</p>																																
<p>Risk Control</p>	<p>Investments made by the Scheme would be in accordance with the investment objectives of the scheme and provisions of SEBI (MF) Regulations. Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process. The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The Scheme will try and mitigate this risk by investing in sufficiently large number of companies within the BFSI space, so as to maintain optimum diversification and keep stock specific concentration risk relatively low. The AMC believes that this diversification would help achieve the desired level of consistency in returns. The AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, the investment team of the AMC will carry out rigorous in-depth analysis of the securities proposed to be invested in. The Scheme may also use various derivatives products for the purpose of trading, hedging and portfolio balancing from time to time, with an attempt to protect the value of the portfolio and enhance Unitholders' interest.</p> <p>While these measures are expected to mitigate the above risks to a large extent, there can be no assurance that these risks would be completely eliminated.</p>
